The new Hayes fire truck, the latest addition to the Portland fire department, was exhibited Tuesday in front of the Palmouth hotel. The truck is a fine substantial piece of mechanism. Its operations were watered by an interested crowd. The truck consists of a long carriage with steering wheel behind and carries a forty-fobt lader supported on a swivel over the forward wheel beam and carries a love-to-be lad-der supported on a swivel over the for ward trucks. By means of a powerful screw operated by a crank, the ladder dan be raised and swung around in any position. An extincionalso is fitted to the ladder so that it can be lengthened to reach eighty or one hundred feet, or to the top of the highest bull ling in the city.
